

# Watcharin Phophuet

## Software Developer

Thailand | Ruayrich.s@gmail.com | +66 97 351 3898

### PROFILE

Software developer with a background that grew from IT support into application development. Hands-on experience across backend systems, REST APIs, databases, automation, system integration, document/file workflows and practical troubleshooting. Focused on understanding existing behavior, making failures visible, and improving systems without losing what already works.

### EXPERIENCE

|                     |                                                                                                                                                                                       |
|---------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Mar 2023 - Nov 2024 | <b>Programmer</b><br><b>FOUR POINT ZERO Co., Ltd.</b><br>Developed web applications using NestJS, PostgreSQL, TypeORM, Docker Compose and Swagger/OpenAPI tooling.                    |
| Jun 2019 - Aug 2021 | <b>Programmer</b><br><b>Service One Solution Co., Ltd.</b><br>Worked on custom website development for IT service-management related work and configured Windows Server environments. |
| Apr 2017 - Dec 2018 | <b>IT Support</b><br><b>WarCom-PT Co., Ltd.</b><br>Supported computer repair, customer service and network troubleshooting across physical, data-link and network-layer concerns.     |

### CORE CAPABILITIES

- Backend services & REST APIs
- Workflow / browser / desktop automation
- SQL / MSSQL & database operations
- System integration & troubleshooting
- Document, PDF, Excel & file workflows
- AI-assisted coding, docs & testing

### TECHNOLOGY

|             |                  |
|-------------|------------------|
| Python      | C# / .NET        |
| NestJS      | JavaScript       |
| SQL / MSSQL | PostgreSQL       |
| FastAPI     | Robot Framework  |
| Playwright  | Docker / Compose |
| Git         | Flutter / Dart   |

### EDUCATION

|                     |                                                                                                |
|---------------------|------------------------------------------------------------------------------------------------|
| Jun 2012 - Dec 2016 | <b>Bachelor of Science (B.S. in e-Business)</b><br>Prince of Songkla University, Phuket Campus |
|---------------------|------------------------------------------------------------------------------------------------|

### CURRENTLY BUILDING

#### Trusted Change Foundry

Personal engineering exploration around safer software change, explicit knowledge, evidence, provenance and reconciliation. Presented as work in progress; public technical evidence will be added when ready.
